Projects

Portfolio Website | Personal Project

March 2016

Self-taught all web dev skills in 4 months during a co-op term. Check it out (links' right below the title)

All the project icons and my personal logo were custom made in illustrator. Project details and technologies used can be found on my [Github account](https://github.com/chrisisonline) [github.com/chrisisonline]

Growth Hack project | American Express

August 2016

Taking the ideas of multiple business teams, we created a working prototype in less than 24 hours for a social experience between AMEX card members. I presented a live demo of our prototype in front of 3 AMEX leaders, including some international guests.

Bio-metric payment | Manulife RED Lab

May 2015

Using bio-metrics and the tech trend towards more flexible forms of payment, we proposed an all new form of transaction. We presented this idea using a live demo of our software along with a 3d model representation of the product.

We had the pleasure of meeting and showing three executive chairmen of Manulife this concept.
