Projects

Portfolio Website   March 2016

Self-taught all web dev skills in 4 months during a co-op term. Check it out (link is right beside my name!)
All the project icons and my personal logo were custom made in illustrator. Project details and technologies used can be found on my Github account [github.com/chrisisonline]

Growth Hack project   August 2016

Taking the ideas of multiple business teams, we created a working prototype in less than 24 hours for a social experience between AMEX card members. I presented a live demo of our prototype in front of 3 AMEX leaders, including some international guests. Our team's idea was combined with another group's, for a chance of being funded and implemented.
