Projects

RED Lab Co-op student project
May 2015

Using bio-metrics and the tech trend towards more flexible forms of payment, we proposed an all new form of transaction. We presented this idea using a live demo of our software along with a 3d model representation of the product.
We had the pleasure of meeting and showing three executive chairmen of Manulife this concept.

Personal portfolio website
March 2016

Self-taught all web development skills in 4 months during a co-op term. Check it out via the sidebar! All project icons and personal logo were custom made in illustrator. Project details and technologies used can be found on my Github account
